- Git

PROJECTS

Full Stack forum application

- Dockerized web forum that allows users to write posts, like/dislike posts & comment.
- Utilized SQLite for Data Management and Golang as a backend.

Pathfinder algorithm

- Created a path-finding algorithm, to find the most efficient paths to move trains from one destination to another.
- Utilized Djikstra, Depth-first search (DFS) and Breadth-first search (BFS) algorithms.

WORK EXPERIENCE

Rasketehnikahooldus (RNE OÜ)   *2022 – 2024*

Chief accountant

- Led financial operations as Chief Accountant for a heavy machinery maintenance company.
- Managed full cycle accounting, payroll, and prepared reports for regulatory compliance and executive insights.
- Conducted cost analyses, ensured budgetary control and identified optimization opportunities.

Powerful Marketers (Ourpower OÜ)   *2020 – 2022*

Accountant

- Managed full-cycle accounting, prepared accounts and tax returns.
- Compiled and presented reports, budgets and financial statements.
- Represented the company in communication with auditors and state authorities.
